Research Administrators

- Monitor all applications through all states, from LOI draft stage to final report.
- Seamlessly coordinate contributions to projects within and across institutions.
- Access payment schedules, program summaries, reports, dashboards, and more.

Researchers

- Easily view deadlines and application histories to improve application success rates.
- Save applications in draft state to avoid lost data and wasted time.
- Report on key performance indicators for funded projects.

Reviewers

- Centralize login credentials across research and funding bodies.
- Create automatic workflow notifications for reviews and proposals.
- Publish funding opportunities and research areas to promote collaboration.

SmartSimple offers a holistic view of your research process; all activities and project applications are attached to the organizational and applicant profiles. Relevant documents and information, including CV data, are easily uploaded to these profiles as well. Additionally, contact information needs to be entered just once.

Funding Agencies

- Manage funding opportunities and application activities throughout the entire process.
- Track meaningful milestones and outcomes for all programs.
- Facilitate industry-government co-funding opportunities.

Research Funders use RMS360⁰ to manage every aspect of their research projects, from drafting the initial proposal to achieving the final milestone.

Research Outcomes

- Define key performance indicators for reporting outcomes of the project.
- Send automatic reminders for due dates using any of the system's communication and workflow tools.
- Access and export scientific progress, summary reports and dashboards in multiple formats.

Research Grants

- Configure each research funding opportunity according to your organization's rules.
- Ensure consistency by sharing common elements between funding calls.
- Enable access and visibility through personalized portals based on their relationship with the organization.
- Automatically generate approvals, declinations and other branded notifications.

Budget & Funding

- Easily link complex projects to multiple sources of funds.
- Create payment schedules linked to reports or milestones.
- Allow multiple iterations of the budget with an auditable history during application and review stages.

Integration, Branding & Engagement

- Easy integration of the RMS360⁰ system with your current website.
- Ensure consistency with your existing brand image.
- Publish calendars and reports on the web to enhance stakeholder engagement.

Eligibility & Formatting Checks

- Enable Researcher eligibility questions, restrict data entry fields, and confirm uploaded document lengths.
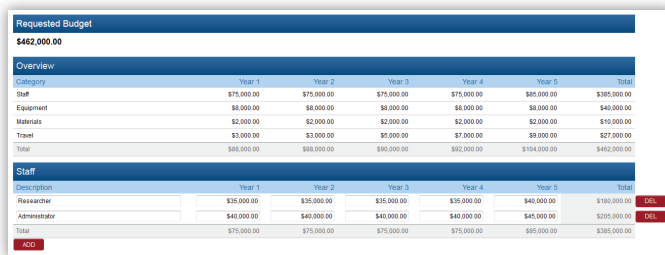

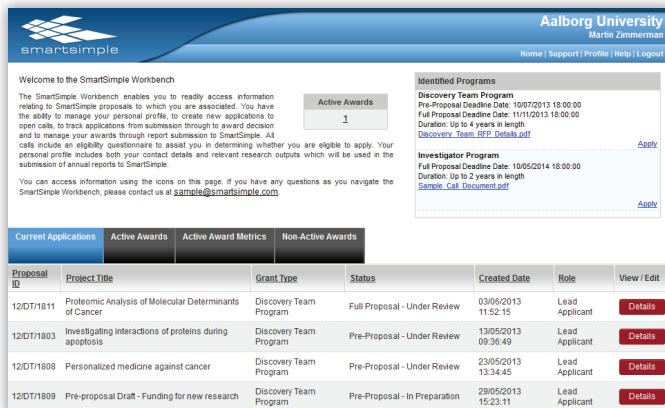

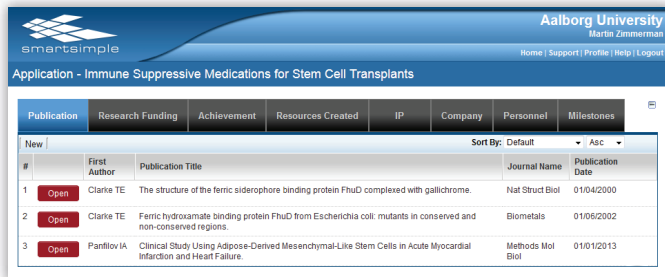

Panel Review Management

- Assign and invite reviewers to applications, either as an individual or as members of a review panel.
- Match reviewers to proposals based on expertise and relevant criteria.
- Enable reviewers to declare conflicts of interest.
- Manage expense claims.
